

# Launch into *STAR Net*'s "Summer of Space"!

As we prepare for the 2019 summer learning program, "A Universe of Stories", CSLP, *STAR Net*, and NASA have been working together on a virtual launch pad filled with numerous STEM resources that libraries can utilize in their celebration of space exploration. With items including vetted STEM activities, partnership opportunities, printables and many other valuable resources, *STAR Net*'s "Summer of Space" [website](#) can provide your library with valuable tools to help your summer learning program achieve great success. *NASA@ My Library* partners, don't forget to register and become eligible to receive additional STEM resources.
